Re: 2008 Average Schedule Local Switching Support Formula, Docket No. 96-45

Dear Ms. Dortch:

Attached is USAC's *2008 Average Schedule Local Switching Support Formula*. This filing is made in compliance with 47 C.F.R. § 54.301(f)(1) and contains the formula used to calculate the local switching revenue requirement for average schedule companies. The formula proposed will become effective for a one-year period beginning on January 1, 2008. USAC has also attached all supporting documentation utilized in the creation of the formula, including schedules prepared by NECA.

Consistent with the directives of DA 06-55, the Commission required that USAC disclose when a Commission Order or rule change causes a change in aggregate local switching universal service support to average schedule companies by more than five percent of the previous year's support. Based on USAC's analysis, modification of the *2008 Average Schedule Local Switching Support Formula* will result in a variance of less than five percent.

In accordance with the Commission's rules, this *2008 Average Schedule Local Switching Support Formula* has been filed electronically in the above-referenced docket.

Sincerely,

/s/ Karen Majcher

Vice President, High Cost and Low Income Division
